

# Discover the Unique NFT Miner Levels on GetFit Mining

GetFit Mining offers a diverse range of NFT miner levels, each with its own unique characteristics and powers. As you progress through these levels, you'll unlock increasingly potent mining capabilities, and every NFT you own is a one-of-a-kind creation.

**1. Primary Miners (100% Power) and Ultra Miners (125% Power):** Primary and Ultra bands can be minted and crafted. These levels are accessible to all users and offer a strong starting point for your fitness mining journey.

**2. Alpha Miners (175% Power) and Omega Miners (200% Power):** Alpha and Omega bands are where the real power resides. While Alphas and Omegas can't be minted directly, they undergo an evolution process to reach their full potential.

**3. Evolution Process:** To evolve your NFT bands, there is a fee involved. The evolution process from Primary to Ultra requires \$40 in BUSD, from Ultra to Alpha it's \$100 in BUSD, and merging two Alphas into an Omega comes with a \$120 BUSD fee. This process also eliminates six NFT bands from circulation for every Omega created, contributing to the supply and demand dynamics within GetFit Mining.

**4. Future Expansion:** Keep an eye on our evolving ecosystem. When we reach 10,000 Alphas in circulation, we'll introduce the option to mint Alphas and Omegas directly, along with the ability to evolve them.

**The Power of Omega Miners:** Omega bands stand as the pinnacle of mining power within GetFit. They come with unique features not found in Primary, Ultra, or Alpha bands, making them highly coveted assets.

**The Evolution Contract and Community Contribution:** The evolution process is an integral part of GetFit Mining's commitment to the community. It works in tandem with the liquidity pool, purchasing GFAM and pairing it with BUSD to ensure liquidity stability. As part of our continuous improvements, we'll be transitioning to USDT in November, following recent developments in the stable token market.

Through the evolution contract, GetFit Mining not only provides advanced mining capabilities but also actively contributes to the value of the tokens you mine. It's a vital component of our mission to empower and reward our dedicated community of fitness enthusiasts and cryptocurrency miners.

# Calculating Costs and Minting Your NFT Miners: A Step-by-Step Guide

At GetFit Mining, we're committed to making the minting process as seamless as possible. Here's a step-by-step guide to determine the amount of BNB, BUSD, and GFAM you'll need, along with the minting process:

- 1. Visit GetFitMining.com:** Start by going to [GetFitMining.com](https://GetFitMining.com). On the front page, you'll find the "Mint" button. Click on it to initiate the minting process.
- 2. Determine GFAM Requirement:** You'll see an option to mint a Primary band, along with the required amount of GFAM tokens. If you're minting one Primary NFT, you'll need the indicated amount of GFAM. For two, three, four, or five Primary bands, multiply the GFAM requirement accordingly.
- 3. Prepare BNB or BUSD:** Ensure you have enough BNB or BUSD in your wallet to make the purchase on PancakeSwap. Click the "Purchase GFAM" button on the [GetFitMining.com](https://GetFitMining.com) website. By default, the link opens to use BUSD for GFAM purchase. If you have BNB BEP20 in your wallet, PancakeSwap will automatically convert it to BUSD in the background.
- 4. Connect Your Wallet to PancakeSwap:** Just like on the GetFit Mining website, connect your wallet to PancakeSwap. This step ensures a secure transaction process.
- 5. Approve and Confirm Purchase:** You'll need to approve and confirm the GFAM token purchase. Once the transaction is complete on the Binance Smart Chain, your GFAM tokens will be in your Dapp wallet and ready for use in minting your NFTs.
- 6. Mint Your Primary Bands:** Return to [GetFitMining.com](https://GetFitMining.com), ensuring your wallet is connected to the Binance Smart Chain. Click the "Mint NFT" button, then click "Allow" to open your wallet. Verify and approve the GFAM spending, which may involve a small fee in BNB BEP20. After approval, click "Craft" to cover the crafting fee through your Dapp wallet. Once complete, you'll see confetti and receive your NFT ID.
- 7. Repeat as Desired:** Continue minting and crafting the number of NFT miners you wish to purchase, following the same process.
- 8. Approve NFT Miners for Mining Dock:** Before docking your NFT miners, you'll need to approve them for movement into the mining dock, a crucial part of the mining process. Ensure your wallet is connected and go to [GetFitMining.com/approve](https://GetFitMining.com/approve). Follow the prompts to approve your NFT miners.

**With these steps completed, you're well on your way to kickstarting your fitness journey with GetFit Mining. We applaud your dedication and commitment to a**

**healthier and wealthier lifestyle. If you have any questions along the way, our community is here to support you on your path to greatness.**
