

Setting Your Unique Referral Code on GetFit Mining: Your Gateway to Earnings

When you first access the GetFit Mining dashboard, your journey begins with a powerful tool: the Global Compensation page. This page is where you can create your very own, unique referral code, and it plays a crucial role in unlocking additional benefits for you and your network of fitness enthusiasts.

Here's how it works:

- 1. Creating Your Referral Code:** This is optional. To get started, navigate to the "Global Compensation" page. Once there, you'll see a field labeled "Edit Referral Code," accompanied by a pencil icon to the left. Click on this pencil to begin.
- 2. Choosing Your Code:** In the pop-out window that appears, you'll have the opportunity to enter your preferred referral code. This code is not case-sensitive, so you have the freedom to get creative. For example, you might choose something like "getfitwithlisa." This unique referral code will be your key to earning commissions and rewards.
- 3. Saving Your Referral Code:** After entering your chosen referral code, click "Save." Your Dapp wallet will then open, prompting you to confirm the record on the blockchain. Please note that there will be a minor transaction fee, usually ranging between 0.04 and 0.06 cents, payable in BNB BEP20 (Binance Coin). Ensure that your wallet is funded with sufficient BNB to cover these transaction fees.
- 4. Confirmation and Activation:** Once the transaction is completed and confirmed, your chosen referral code will appear in the "Set Referral Code" field. This code is now active and ready to be shared with potential users.

The Power of Your Referral Code:

Your unique referral code is not just a random string of characters; it's a powerful tool for building your network and earning commissions. When you introduce someone to GetFit Mining and they sign up using your referral code, they become linked as your direct referred person. This means that you'll earn a 35% commission each time they mint and craft an NFT miner.

In essence, your referral code is your key to expanding your GetFit Mining family and increasing your rewards. So, start sharing your code with friends, family, and fitness

enthusiasts, and watch your earnings grow as you inspire others on their fitness and financial journey.

Remember, your unique referral code is your digital signature of success on GetFit Mining. So, set it, share it, and let the rewards roll in!

When it comes to our referral system, simplicity and transparency are key. Your unique referral code or wallet address is your link to a network of individuals who join GetFit Mining through your invitation. If you choose not to use a referral code, your wallet address automatically serves as the link connecting referred users to you. This robust system is powered by smart contracts, ensuring that commissions are calculated and paid out in real-time. As you inspire others to mint NFTs and embark on their GetFit Mining journey, you'll earn commissions effortlessly. To find your referral link or code, simply navigate to the 'Marketing' tab on your dashboard, where you'll have easy access to the tools you need to share GetFit Mining with friends and fellow fitness enthusiasts, all while reaping the rewards of your leadership.
